Before you send your file

- ☐ **Send a print-ready PDF.** No crop marks, trim marks or registration marks please.
- ☐ **CMYK colour mode.** RGB files can print duller or shift colour, so convert before you export.
- ☐ **Outline your fonts.** Convert all text to outlines so nothing gets swapped out.
- ☐ **Embed everything.** Images and placed files must be embedded, not linked.
- ☐ **Build at 100% scale.** Our template is full size: set your artboard to the artwork size including bleed.
- ☐ **Image resolution.** At least 130 ppi at full printed size (150 ppi or more looks crisper up close).
- ☐ **Bleed.** Run background colours and images out to the bleed line, 10 mm past the finished edge all the way round.
- ☐ **Safe area.** Keep logos, text and phone numbers at least 30 mm in from every edge, clear of the frame hardware and hinges.
- ☐ **Two sides.** Supply a two-page PDF: page 1 is the front, page 2 is the back. Same design both sides? Just send it twice.
- ☐ **Spot colours.** If you need a Pantone match, specify it from the PANTONE+ Solid Coated library.
