ARTWORK GUIDE

Corflute Sign

1200 x 900 mm landscape

Everything you need to set up artwork for a 1200 x 900 mm landscape corflute sign. Corflute is lightweight, weatherproof corrugated plastic, printed in full colour, single or double sided. If you order double sided, supply a front and a back design at the same size. The finished size below is the trimmed sign. Use our matching template and you can't go wrong.

DIAGRAM - NOT TO SCALE

Safe area: 20 mm in from every edge

Corner squares: 40 x 40 mm eyelet zones, only if your order has eyelets

Bleed line — Finished edge ····· Safe area — Eyelet zone (if ordered)

Key measurements

Artwork size incl. bleed	1,202 x 902 mm
Finished (trimmed) size	1,200 x 900 mm
Bleed	1 mm on every edge
Safe area	1,160 x 860 mm (20 mm from every edge)
Eyelet zones	Keep 40 mm clear wherever an eyelet goes
Eyelets (optional)	Clear, 25 mm outside / 12 mm hole
Printing	Single or double sided, full colour
Thickness	5 mm corflute
Our template	100% scale, 2 pages: front and back

Before you send your file

- ☐ **Send a print-ready PDF.** No crop marks, trim marks or registration marks please.
- ☐ **CMYK colour mode.** RGB files can print duller or shift colour, so convert before you export.
- ☐ **Outline your fonts.** Convert all text to outlines so nothing gets swapped out.
- ☐ **Embed everything.** Images and placed files must be embedded, not linked.
- ☐ **Build at 100% scale.** Our template is full size: set your artboard to the artwork size including bleed.
- ☐ **Image resolution.** At least 130 ppi at full printed size (150 ppi or more looks crisper up close).
- ☐ **Bleed.** Run background colours and images out to the bleed line, 1 mm past the finished edge all the way round.
- ☐ **Safe area.** Keep logos, text and phone numbers at least 20 mm in from every edge.
- ☐ **Eyelets.** If you're ordering eyelets, keep 40 mm clear of text and logos wherever an eyelet goes (corners, top corners, sides, or a custom position: just tell us where).
- ☐ **Double sided?** Supply a two-page PDF: page 1 is the front, page 2 is the back. Same design both sides? Just send it twice.
- ☐ **Custom shape?** We can contour cut to a custom outline. Draw the cut path as a spot colour named **cut** and keep it on its own layer.
- ☐ **Spot colours.** If you need a Pantone match, specify it from the PANTONE+ Solid Coated library.

Mounting and flute direction

Corflute has hollow flutes (channels) running one way through the sheet. If you'll push the sign onto wire ground stakes, the flutes must run **vertically** so the stake legs slide in. If you'll cable-tie it to a pole, post or fence, **horizontal** flutes give more strength and stop the sign wrapping around the pole in the wind. Tell us how you'll mount it and we'll set the direction to suit. Eyelets make cable ties and hooks quick and neat.

About corflute signs

Durable, lightweight and weatherproof: ideal for real estate, building sites, events, elections, directional and temporary signs. Made from stiff 5 mm corflute; eyelets are clear, so your design shows through them.

Sending us your file

Email your finished PDF to **infothesignageshed@gmail.com**. If it's too big to attach, share a Google Drive or WeTransfer link instead. We'll check it over and send you a proof before anything goes to print.
